Journal of the Idaho Academy of Science and Engineering

The ***Journal of the Idaho Academy of Science and Engineering*** (JIASE) aims to:

- Provide a platform for Idaho researchers and scholars to share original research results, reviews, and perspectives,
- Promote interdisciplinary collaboration, and
- Contribute to the advancement of knowledge and innovation,

with a focus on work performed in Idaho, or on topics of specific Idaho interest, that have not been published elsewhere. It also provides an occasional special issue dedicated to a specific topic or theme.

Submissions in all fields of science (including biology, chemistry, physics, geology, mathematics, psychology and other social sciences), science education, computer science, engineering, or technology, are invited and encouraged.

The JIASE specializes in publishing fully-refereed papers, and all manuscripts are subjected to rigorous double-blind peer review by experts and practitioners in the same or closely-related fields, thus ensuring the highest standards of quality and scientific integrity.

Overall, the JIASE is an essential resource for students, educators, and professionals seeking to stay up-to-date on the latest developments in science and engineering research in the region.

Historically, the JIASE has been abstracted in Bioabstracts, State Academies of Science Abstracts (SASA), U.S. Department of the Interior Fish and Wildlife Service Publications, Wildlife Review and Sport Fisheries Abstracts, and deposited in over 40 libraries, nationally and internationally.

Since 2014 the ***JIASE*** has been an open-access publication. PDF copies of all issues are available at no charge through the IASE website.

Manuscripts and correspondence concerning their content should be addressed to
JIASE.Editor@Idaho.Academy.
